**Plug-and-  
play**

## HOW IT ALL BEGAN ...

While attending a spin class back in 2014, LEDSnaps CEO and keen cyclist Ian Kirby couldn't help but notice how the halogen downlights flashing on and off during the class were failing to add any value to the atmosphere. Being an experienced lighting professional...this got him thinking. Soon he set about designing a system that would respond to the BPM of a particular class.

## EXPANSION AND DEVELOPMENT ...

With the reported benefits of Immersive systems proven to add and retain members Ian wondered why more gyms hadn't invested in the system and assumed this was cost and or operational efficiency. With his lighting business in lockdown due to Covid Ian and his team set about designing a system that would be a huge improvement over the current lighting offerings. Core to this concept was the ability of the system to just plug together, hang from any ceiling, offer more complex and fun lighting programs, cut supply chain issues by manufacturing in the UK, and save on the cost of installation.

After 18 months of research and development the system was launched in August 2021 with the first deliveries being supplied in September 2021.

## PATENT PENDING ...

So unique is the concept that the company applied for a Patent in 2021.

LEDSnaps systems are installed in hundreds of locations, from luxury home gyms to corporate fitness centres, transforming workout environments one gym at a time.

LED Snaps

# About us

LED  SNAPS

## Perfect Lighting, Whatever your Workout

Experience the world's No.1 fitness lighting with LED Snaps—where innovative design meets exceptional performance to transform your fitness space.

### House Lights

Are you looking for bespoke white lighting to enhance all areas of your fitness space? We have got you covered!

### Spin Class

Create the ultimate immersive experience for your spin classes with our audio-compatible PACE system.

### Hi Impact Cardio

Take your cardio classes to the next level with our colourful and dynamic PACE system. Motivate your members like never before!

### Yoga

We offer lighting ideal for yoga studios. Whether you are looking for static white light or soft and gradual coloured light, our systems will work for you.

### Pilates

Our lighting systems offer a calming and focused environment that enhances the mind-body connection, with soft, even lighting.

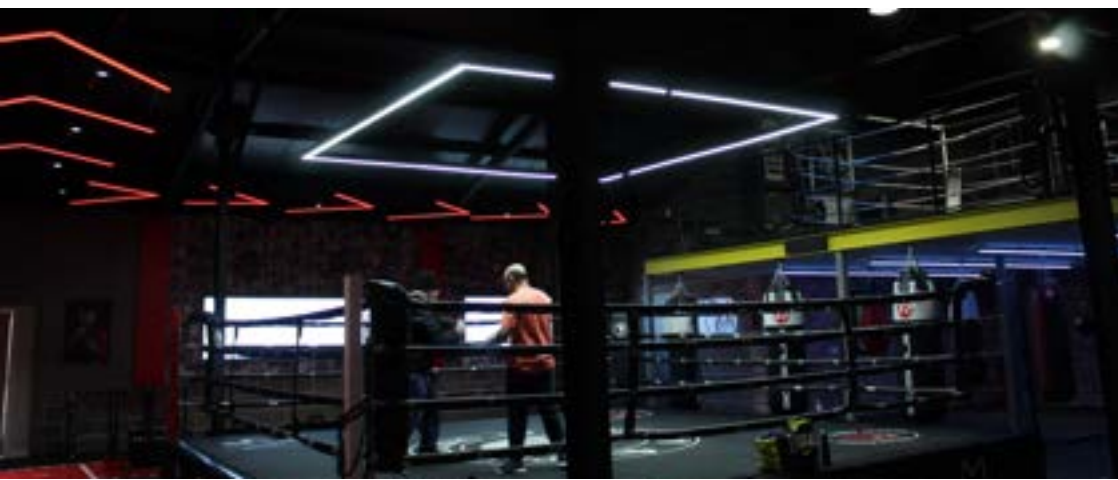

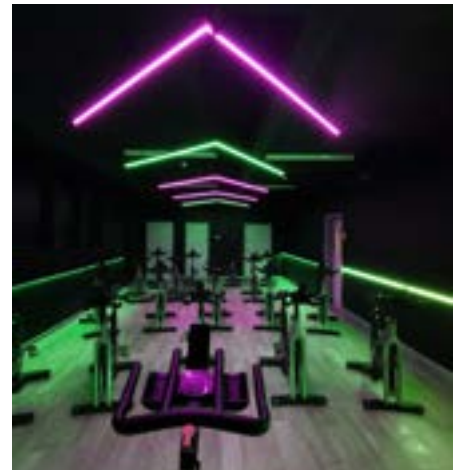

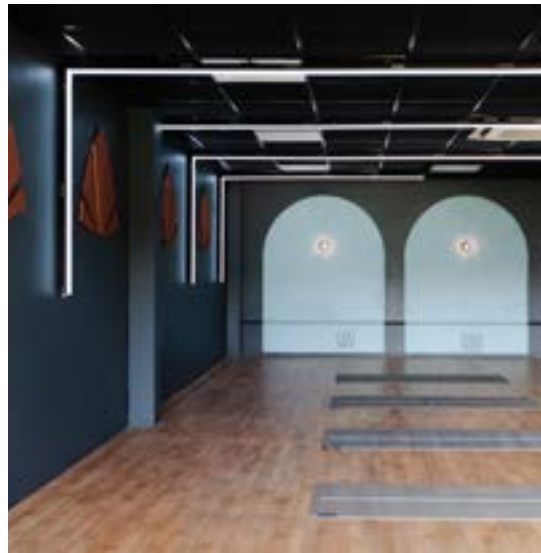

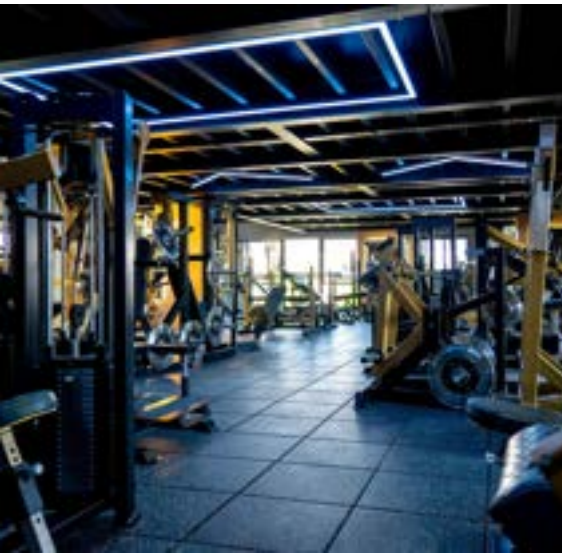

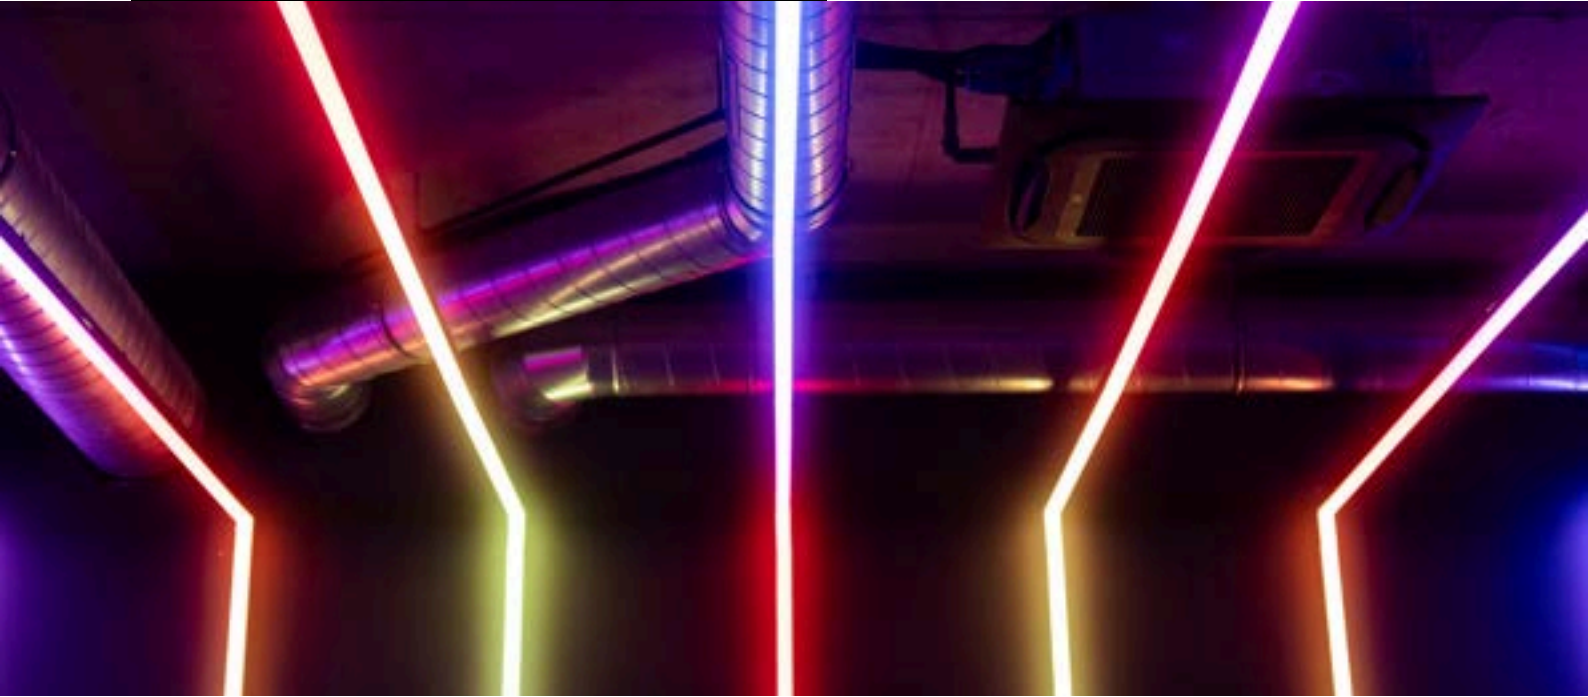

### Boxing

Our systems can provide bright and motivating lighting ideal for the boxing ring and training areas.

# PACE System

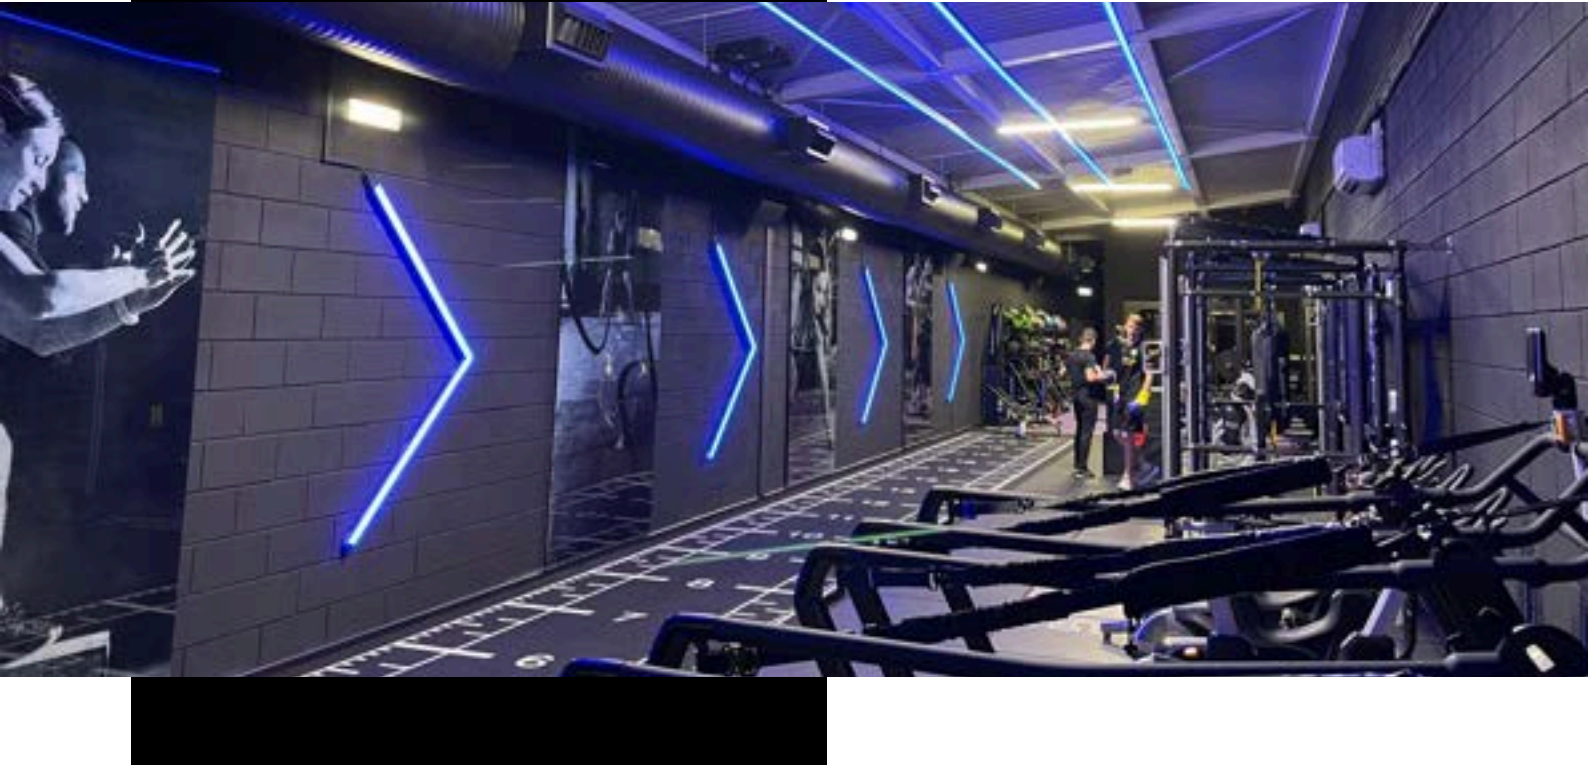

LED  SNAPS

The PACE System is an out-of-the-box solution like nothing else on the market. Just plug and play!

- Provides an immersive lighting experience with a hassle free plug and play installation
- Powered internally by Mean Well for stable and reliable power
- Pre-configured Driver to avoid costly and time consuming programming
- Pre-programmed and customised Control Panel to ensure the best user experience
- 50,000 hours typical source life
- 230 VAC I/P, 12V DC internal power supply

**PLEASE NOTE:** An electrician will simply need to run power to the Driver and attach the PACE bars to the ceiling.

## PACE 1200 | 600 | 400

Any combination of 1200, 600 or 400 can be snapped together to create linear lines or more complex shapes by adding corners.

### Connecting Corners

We produce 'flat' corners for creating squares or rectangle designs and 'inside' corners to enable the lighting to go vertically on a wall and then across the ceiling.

*Our Systems*

# PACE System

## Audio Kits

If you require the music to light mode we supply two different connection methods to your audio system. Our Line in kit includes everything you need to connect through a 3.5mm socket. Our microphone kit can sample the BPM from the music played in the room.

**MADE IN  
BRITAIN**®

## Control Panel

The Control Panel has been designed to be intuitive and easy to use. The tablet has 5 different modes including, house lights, colour picker, slow effects, fast effects and music to light.

\*Customisation of the Home Screen is available upon request.

## Driver Pro

The Wi-Fi enabled Driver Pro is the heart of the PACE system. It is designed to be mounted on a wall out of sight and can have either 4 or 8 outputs depending on the size of the installation. Each output can, in theory, run up to 20 PACE bars.

## Mounting Hardware

We produce a complete range of fixing hardware to enable our lights to be installed on a variety of different surfaces including, surface mount, suspended ceilings, existing track lighting and flat ceilings.

*Our Systems*

# LumiPro System

LED  SNAPS

The LumiPro System is an easy to install gym lighting solution that provides complete and even illumination over workout equipment/area's.

- Modular design with convenient replacement.
- Multiple installation options: Suspended/Surface mounted/Linkable.
- The typical life of the product is 50000 hours.
- Clear polycarbonate cover + PMMA prismatic plate + frosted film.
- Selectable CCT 3000K/4000K/5000K with manual switch.
- Flicker free and high efficiency LED driver.

**PLEASE NOTE:** An electrician will simply need to hard wire the LumiPro system to the mains circuit.

## **LumiPro 1200 | 600**

LumiPro 1200 | 600 fit together to provide a continuous line of white light, with interchangeable CCT 3000K/4000K/5000K with a manual switch.

## **Connecting Corners**

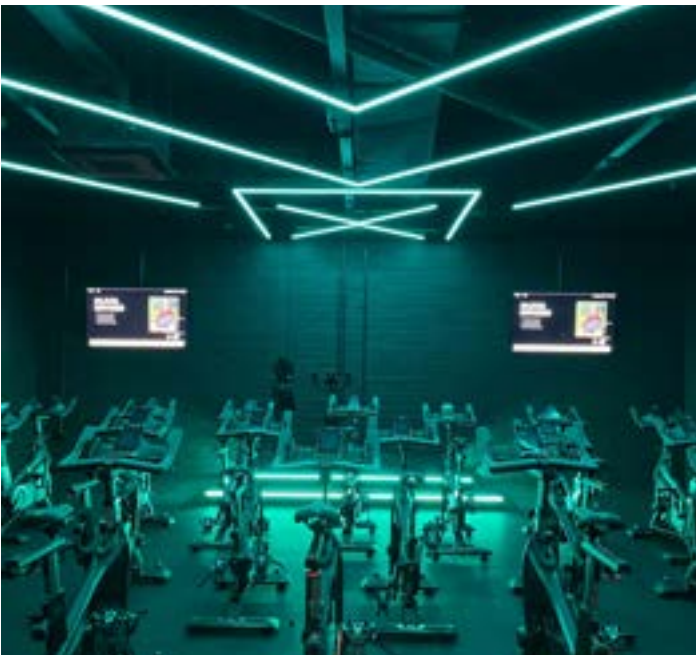

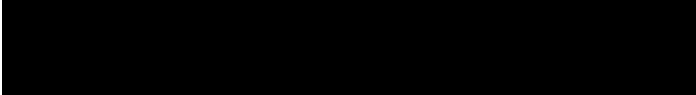

We manufacture corners, T and X pieces for more design led installations, bars fit together with brackets and fixing hardware.

## **Mounting Hardware**

LumiPro system can be fitted as suspended lighting fixtures using a drop wire.

Alternatively the lighting fixtures can be surface mounted onto a flat surface.

# LED SNAPS

‘The lights are absolutely insane – the effects, variety, responsiveness, customizability – it’s everything we dreamed of for our spin studio and our team and customers are floored by their capabilities. They absolutely transform our bike room over and over throughout a cycle class and bring a dynamic energy to the room.’

**KATHERINE MITCHELL**

SELF Cycle Co

‘LED Snaps are our go-to for immersive gym lighting. The sound to light function is perfect for creating a motivating studio environment and their adaptability makes them ideal for facilities that are constantly growing and evolving. The team are also a joy to deal with – can’t recommend LED Snaps enough!’
